
60 x 60mm Square Label

Helpful Label Setup Information

When setting up your artwork, we recommend you add a 'print safe' border of 5mm around the edge of your artwork. Here you should not add any text, logos or important graphic design which may be not printed as you'd expect during the production process due to how print is rendered onto the label stock.

Please ensure your artwork contains 3mm of 'bleed' outside the print artwork size on all edges.
